

Ticino Hotels Group

“How SAP Business One helps us manage our chain of luxury hotels while supporting our growth”

“ Before SAP Business One, each month we would have to rearrange and aggregate the financial information that was stored in various spreadsheets. Today, with no effort, we can continuously monitor the financial situation of each hotel and manage the group of hotels. The time and resources saved are now redirected on creating improved services to guests.

Matteo Cervaro, IT Manager

”

Industry

Tourism – Hospitality - Restaurant

Why SAP and MTF

- SAP enables an integrated management of the financial/logistic processes for the group
- SAP Business One makes real-time business critical information available at any time
- MTF, thanks to its experience in the sector, knows our hotel specific accounting needs

Main Benefits

- Flexibility, immediacy and accuracy in data analysis
- Provides valuable insight to business and helps reducing waste
- Allows the tracking of costs, revenues and cash flow
- Enables an effective management of planned and controlled procurements (with budget)
- Each hotel is free to choose the features and modules that suit its needs, and yet remains in line with the standardized processes of the group

Customer quote

“Each new hotel is effortlessly introduced into the centralized system because SAP Business One helped us standardize all key business procedures, accounting processes, reporting activity, and IT infrastructure. Data is then synchronized and the cash flow is consolidated. The group owner and the managers of the various structures can safely work on consistent and accurate data, where the risk of errors due to a misinterpretation of the spreadsheets or obsolete databases is eliminated”.

Solutions

- SAP Business One
- Cost Accounting Module by MTF (U.S.A.L.I., to manage the hotel accounting needs)
- Payroll and Human Resources module by HR Persal (Swissdec Certified)
